

Finding God Video

Key Dates:

March 27, 2012	Find images, save them in a Power Point
April 3, 2012	Import into Movie Maker, learn the basics
April 17, 2012	Last day for contest - finish up movie, review and submit
April 24, 2012	Unfinished movies are completed and submitted

During the next three classes you will be creating a very short video using Power Point and Windows Live Movie Maker titled "Finding God." As we discussed during Religion class, we can find God in many areas of our lives. Your job is to find images that illustrate how you find God in your world.

Some topics that were shared during class were:

Nature, People, Places, School, Church

We then discussed being more specific:

Nature became "the sun setting behind a mountain"

People became "a firefighter putting out a fire"

School became "A kid inviting another kid to play"

The next job is to find these images. Images WILL come from Google images, and CAN come from your personal photos.

Personal photos must be brought in on a flash drive during the next class. Due to the very short nature of this assignment, that is the only time we will upload personal photos.

How to Add a Picture with the Link to Power Point

1. Find an image by searching in Google images
2. Click INTO the image
3. Copy the image and paste it into Power Point
4. Go back to the image and copy the url
5. Go back to Power Point and right click on the image to add the hyperlink
